

< React (Native) developer />

I learned programming, in order to get a creative, ethical, challenging and versatile job.

First, I learned Java to become an Android developer. Then, I switched to React (Native). Currently I'm busy with my personal projects

There are more than 6.000 hours of coding and many certificates in my toolkit. And I feel pretty confident when incorporating new APIs!

Fotios Tsakiris

Technical Skills:

HTML5

CSS3

SASS

JavaScript (ES6)

TypeScript

React

React Native

React Navigation

RN Animations

RN Reanimated 2

Redux

Redux Toolkit

React Testing Library

Git

Firebase

Algorithms

Data structures

Java (basic)

Personal Projects

Throughout my journey, I've made tenths of tutorial instructed projects and several personal projects.

1. **EN TOYTO NIKA - In this you conquer (quiz)**

v1: 2021/10 - 2022/09 (React Native app)

- **Features:**

- Sign up and other auth options.
- Games: multiple choice, true/false, with four categories each, plus an option to play with as many categories mixed.
- Take breaks, with an indication which game is on, and start from where you left each game.
- Play with or without timer.
- Leaderboard: sort according to points or rewards/medals.
- Success-rate for each player and all players.
- Localisation: Comes in Greek and English languages.
- Vivid animations!
- Dark/light mode.
- Push notifications (scheduled and remote).
- And many more...

Languages:

Greek, English, Dutch

Competences

Honesty & Ethics

Co-workers and customers will trust that they have their best interests at heart.

Responsibility

Comfortable making decisions and taking ownership of my work.

Personal activity

Praying

Chanting

Swimming

Running

Workout

A couple of things to point out from technical perspective:

- User downloads only one time the questions per category, then games with or without timer use the same bundle.
- Further, the options in each question are shuffled, so the right answer is not always the same option.
- If the user plays with the timer and closes the app while a question is on, the timer goes on, taking a stamp from local time. Thus ...

The app was published in 2022/07, in both stores.

Please search for: In this you Conquer, or Εν τούτω Νικά.

Or else, check the following links.

Android: [In this you Conquer!](#)

iOS: [In this you Conquer!](#)

There are another 5 published projects which you may find in my [LinkedIn profile](#).

Experience

Mainly, I've worked as a waiter. I code 5 hours a day (without the breaks). In between I was working in the catering, but last year I decided to focus in programming (since I want to make a living out of it) so I quitted my job.

Now I'm waiting for a good offer.

Thank you.

Education

Bachelor on Greek Orthodox Theology

Aristotle's University, Greece, 2004 - 2008

Greek Orthodox Theology, is essential to life. It helps us understand basic truths, about ourselves, the creation and God. With that kind of knowledge, we stand in a better position, as we try to do our work like true human beings!
